

## Accu-Chek® LinkAssist Training Chart

The Accu-Chek LinkAssist insertion device to insert your Accu-Chek FlexLink infusion set easily and virtually pain-free even at hard to reach infusion sites.

**A** Release button    **D** Loading chamber  
**B** Safety catch    **E** Base  
**C** Tensioning element

**1** Before unpacking your infusion set, wash your hands thoroughly. Push the tensioning element of the insertion device into its base.

**2** Insert the infusion set from below into the loading chamber until it locks into place.

**3** Remove the transparent protective cover of the infusion set by turning and pulling at the same time.

**4** Remove both pieces of the self-adhesive backing from the self-adhesive.

**5** Pull the tensioning element out as far as it will go.

**6** Slide the safety catch out of the «lock» position.

**7** Position the insertion device onto the prepared infusion site. Press the release button. Then remove the insertion device.

**8** Press the adhesive plaster firmly onto the infusion site, ensuring that it makes good contact with the skin.

**9** Hold the self-adhesive in place, gently press the side clips of the blue holder cap and pull it from the cannula housing.

**10** Hold the cannula housing firmly to your body. Use the handle to withdraw the introduce needle in a right angle.

**11** Connect the primed transfer set to the connector plate. Before resuming insulin pump therapy, use an insulin bolus of 1.0 U to fill the head set and the soft cannula.

For detailed instructions and important safety information, please consult the instruction accompanying this product and the infusion set.
